

SCALA STUCCO

A highly sophisticated decoration. A perfect quality of the surface imitating stuccos and marble slabs.

The product gives the effect of colour blending with each other which forms impressive decorations of walls and details. Apply the acrylic mass with a float or a trowel, coat on coat.

To achieve the gloss effect and smoothness, polish up the final decoration using a stainless steel trowel or a float.

TELSTAR

Gentle colours and old plaster texture. The product is a fine-grained mineral decorative compound applied with a float. Allows to achieve a smooth and irregular texture of old plaster.

To reach the colouristic effect apply telstar Nuance (patina) on telstar Inter (background) and then pass it over with a Talorex float.

VERANO

Verano - a decorative system making the spatial effect of creased paper, fabric or skin.

The product of a velvet consistency, semi-thick. Enables to embed special glassine paper in order to acquire a very realistic look of a creased or crumpled surface. The system enables to use a wide range of Reflets and Nuances making the impression of colouristic shifts.

TRAVERTINE

A mineral decoration that is used to successfully imitate natural travertine, including the characteristic pitting and cavities. A better protection thanks to (Zolpalith) impregnate.

Colour, style, life...

We offer a wide range of decorative systems suitable for customers and architects.
- products in the aqueous phase for the comfort of use and the ambient
- multi-purpose-systems: large facilities - mechanical application; small and medium objects - call for the dexterity of the true artists
- enhanced protection of the decorations makes them all-purpose products

We hope our offer will facilitate the selection and purchase of a suitable product.

Apart from a wide range of decorative systems and paints we also offer a broad variety of tools:

INOX FLOAT
"SPECIAL STUC"

ABS FLOAT
"STUC" TEFLON

STUCCATEUR

Indoor and outdoor
decorating systems

DUOMO

The "Venetian Clay" effect with an additive of gold and silver flakes.

A single component decoration applied manually with a wide brush. It is spread with a putty knife using a white or coloured base.

Simple and easy to be made in just one day.

CERAMUR

The effect of multicoloured flakes of a gentle structure.

A multicoloured flakes-based decoration sprayed on the wet base.

A durable and washable decoration.

Finishing with a varnish offers an improved protection (a matt or satin look).

AMANDINE

Amandine is perfect for public areas and traffic routs thanks to an easy way of applying, resistance to soiling, scratch and water washing.

The marble coat is protected with varnish with an additive of multicolour flakes. The effect can be intensified with glitter, making the interior look interesting and spacious.

ZOLFLEX

Resistant fibreglass wallpapers are offered in 60 different patterns. Installed and painted fibreglass wallpapers give an effective, solid and colourful protection of ceilings and walls.

Easy surface preparation.

Very good mechanical impact resistance.

Long-term warranty.

Can be painted 10 times.

SAHARA

A decorative quartz paint. A paint intended for interior designs has unique ornamental and practical qualities. Based on water emulsion, quartz dusts and metallic additives providing an intriguing play of light and colourful reflections imitating desert sand shining in the sun with gold, silver or pearl glow.

A wide range of about 80 different colours enables to create an individual way of designing all types of rooms and details.

ANTIQUUE IMAGE

A unique mineral based product in antique gold or silver which opalesce light distinctively. It is easy to apply and can be used to decorate outside and inside walls. The final effect casts fantastic rays of light depending on the tool or base colour which were used and enables to receive unusual, unevenly coloured areas of a chosen colour, which are highlighted by the light.

DIAPAZON

The beauty and effect of old sand plaster.

The plaster mass is applied manually with a float.

A gentle „cloud texture" effect can be achieved by applying two colours at the same time using a mixing method (wet on wet).

An indoor and outdoor decorative coating.

MARMOFLOAT

Decorative plaster based on lime and marble enables creating a concrete and marble texture (salt and pepper) or a natural rock (e.g. travertine).

Matt or mineral look, high coat resistance, excellent water vapour permeability.

Readymade product allows an architect and a contractor to highlight its natural beauty.

REFLET

A preparation enriching our decorative products with the gold, copper, bronze and pearl effect which makes the surface look original and unique.

STROMBOLI

A sprayed decoration in a sophisticated wide range of colours and shadows.

A multicoloured paint applied mechanically on the surface, according to the colour of the decoration, making it smooth and delicate in touch.

Perfect for large objects, offices, hotels, etc.

It is possible to protect the surface using a matt, satin or gloss varnish.
